DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 17, drawn to the utility line support structure, classified in class 52, subclass 730.1.
 - II. Claims 18 – 23, drawn to the method of manufacturing a utility line support structure, classified in class 52, subclass 745.17.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the beam may be formed via mold casting and secured in place with waterproof mechanical ties around the utility pole.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 3635

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
